"...selfish members win within groups, but groups of altruists best groups of selfish members."
E.O. Wilson

"...the greatest advantage of selflessness was that it helped our ancestors to develop larger brains. This step was possible only because our distant progenitors began to share and cooperate like no other creature. To do that, they had to overcome the boundaries of self and learn to see the world with the eyes of another and feel like another.

Altruism is what made us human."

Stefan Klein
